DigitME2

Fully funded support for Lancashire Manufacturers

The University of Central Lancashire is offering eligible Lancashire based manufacturing companies, fully funded support to help assess current manufacturing technology levels and undertake short term research projects to develop their manufacturing process through new technology adoption.

Each project offers 150 hours of funded feasibility study, and includes a 12 hour technology audit to review potential new technology deployment

The work targets Industry 4.0 technologies

- Big Data
- Robotics
- Automation
- 3D printing
